Portfolio: <https://sonluseco.github.io/Portfolio/>

CAREER OBJECTIVE: Computer Engineering graduate who has practical knowledge of OSP network design, FTTH deployment, and ODN planning. Looking to take an entry-level position in Network Engineering or Information Assurance to implement Cisco and Fortinet knowledge to create secure and reliable network infrastructures. Looking forward to expanding technical skills at both physical and logical network layers.

EDUCATIONAL BACKGROUND:

Bachelor of Science in Computer Engineering

National University - Dasmarinas, Cavite

2023 - 2026

Relevant Engineering Coursework (Undergraduate)

Mechanical Engineering, Marine Engineering

- Technical Drafting and AutoCAD
- Engineering Mathematics
- Basic Electronics and Systems
- Blueprint Reading and Design Fundamentals
- Basic Systems and Engineering Principles

WORK EXPERIENCE/S:

Technical Support Intern – Network & Infrastructure

Universal Access and Systems Solutions, Inc. (UAS)

February 2026 – May 2026

- Assist in laboratory exercises, configuration drills, and testing activities involving enterprise networking, security, and data center technologies.
- Support deployment preparation tasks such as equipment staging, hardware acceptance testing (HAT), unboxing, and inventory checking.
- Draft and maintain technical documentation including Method of Procedure (MOP) documents, configuration backups, checklists, and project deliverables.
- Participate in self-paced technical training and assessments through vendor learning platforms such as Cisco, Fortinet, Check Point, Nutanix, VMware, and related technologies.
- Shadow Solutions Engineers and Customer Support Engineers during implementation, commissioning, troubleshooting, and support activities.
- Attend internal meetings, technical discussions, team huddles, and knowledge-sharing sessions.
- Prepare and submit weekly accomplishment reports, journals, and final capstone outputs.
- Follow company operational procedures, information security policies, and confidentiality requirements.

OSP Backbone Network Design Engineer – Fiber Infrastructure (HDD)

DSCP Inc.

August 2021 – March 2023

- Designed and documented OSP fiber backbone and access network infrastructure to support broadband connectivity for major ISPs including Converge and Globe.
- Developed detailed network layouts, route maps, and construction drawings using AutoCAD for fiber backbone deployment.
- Mapped and documented underground fiber routes, HDD pathways, duct lines, handholes, and backbone distribution infrastructure.
- Performed site validation and field coordination to verify network routes and ensure accuracy of engineering plans.
- Produced as-built documentation reflecting final installed network infrastructure and routing configurations.
- Collaborated with engineers, planners, and field teams to resolve routing conflicts and improve network design accuracy.

Network Infrastructure CAD Designer & Field Surveyor (Telecom / ODN)

Fiber One Engineering Services | Concentrics Engineering Services | Rapid Fiber Cable Installation Services (RCIS)

October 2020 – May 2021

- Supported FTTH (Fiber-to-the-Home) and ODN deployment projects for major ISPs including PLDT, Converge, and Streamtech across multiple Luzon regions.
- Conducted field surveys and route validation to assess aerial fiber paths, pole placements, span distances, and clearance requirements.
- Produced AutoCAD technical drawings and ODN layout plans for pole-mounted fiber routing and distribution infrastructure.
- Verified field survey data against engineering designs to ensure compliance before network deployment.
- Prepared accurate as-built documentation reflecting final network installations and route adjustments.
- Coordinated with engineering teams and field technicians to address routing changes and resolve design issues during deployment.

AutoCAD Operator

Fujisash Philippines Inc. (FCIE -PEZA)

September 2019 – November 2019

- Produced detailed AutoCAD technical drawings supporting engineering and manufacturing projects for Japanese clients.
- Created CAD layouts and fabrication drawings for aluminum glass door and window systems based on design specifications.
- Ensured drawing accuracy and compliance with engineering design standards prior to production.

TECHNICAL SKILLS:

- **Networking & Security:** TCP/IP, Subnetting, VLANs, Routing & Switching, SD-WAN, Firewall Policy Configuration, Cisco Packet Tracer, Hardware Acceptance Testing (HAT), Network Troubleshooting, and Cybersecurity Fundamentals (Information Assurance, Cryptography, Access Control).
- **Network Devices & Systems:** Cisco, Aruba, Meraki, Fortinet, and VoIP Devices; Firmware Upgrades, Device Validation, Vulnerability Checking, CMDB Management, and Preventive Maintenance Documentation.
- **Fiber & Telecom:** OSP Backbone Design, FTTH, ODN Planning, HDD Pathways, and Site Validation.
- **Design & Software:** AutoCAD (2D/3D), Revit, Android Studio, Microsoft Office Suite, Technical Drafting, and As-Built Documentation.
- **Hardware & Engineering:** Basic Circuit Analysis, Electronics Theory, Engineering Design Verification, and Technical Documentation (MOP & PM Reports).
- **Key Certifications:** Cisco (Network Technician, Cybersecurity, Black Belt Pre-Sales), Fortinet (NSE), IT Specialist – Networking, Google Technical Support Fundamentals, Networking Academy Modules.

CERTIFICATIONS & TRAININGS:

Cisco Networking Academy Certifications (2026)

- Cybersecurity Defense Analyst Career Path
- Junior Cybersecurity Analyst Career Path
- Network Technician Career Path
- Networking Devices and Initial Configuration
- Networking Basics

Technical Support Fundamentals

Google (March 2026)

Fortinet Training Institute Certifications (2026)

- Fortinet Certified Associate Cybersecurity
- Fortinet FortiGate 7.6 Operator
- Technical Introduction to Cybersecurity
- Fortinet Certified Fundamentals Cybersecurity
- Getting Started in Cybersecurity 3.0
- Introduction to the Threat Landscape 3.0

IT Specialist – Networking

Certiport (August 7, 2025)

Microsoft Learn Cybersecurity Fundamentals (2025)

- Network-based and application-based threats
- Authentication and access control
- Cryptography fundamentals

TESDA Certifications & Trainings (2018 – 2019)

- National Certificate I – Automotive Servicing
- National Certificate II – Technical Drafting
- Revit Architecture Training
- Electrical & Sanitary Drafting + AutoCAD 3D
- Architectural & Structural Drafting with AutoCAD 2D

Seminars and Workshops

- ITIL v4 Foundation Training - UAS (2026)
- DICT4A - eGovPh Information Session (2026)
- Personal AI Projects to Try Over the Holiday Break (2025)
- Data Architecture for the Age of Generative AI (2025)
- Introduction to Information Assurance Security (2025)
- Digital Citizenship and Cybersecurity: Smart in Safe Digital World (2025)
- AI in Cybersecurity: Key Benefits, Defense Strategy, and Future Trends (2025)
- Electronic Systems and Technologies 4.0 (2025)
- Android Studio 101: Crafting Your First App (2024)
- Personality Development & Workplace Etiquette Seminar (2018)

ORGANIZATION

International Order of DeMolay — Member

June 12, 2017 – Present
